

Universidad Nacional Autonoma de Mexico in Mexico
The visit took place between 17 April and 16 May of 2012

1. On April 23 I gave the seminar “Computer simulations of rod-coil polymers”.
2. During my stay in Mexico I attended several discussions on applications of Monte Carlo simulations to study the self-assembly of different heterogeneous molecules in monolayers and slit-like pores.
3. Over entire period of the visit I worked on simulation programs to investigate the phase transitions in monolayers of Janus discs.
